(54) FRONT LOADING DISK PLAYER

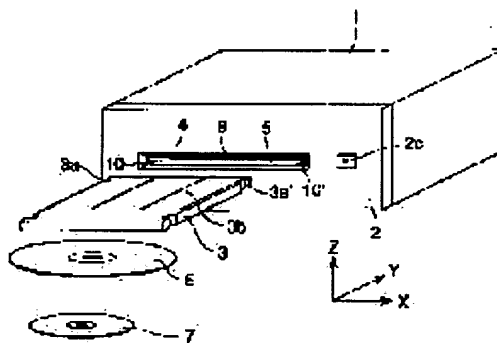

(57)Abstract:

PROBLEM TO BE SOLVED: To pull in either a bare disk or a cartridge storing disk into the housing and to enable playing by providing an inserting port into which the bare disk and the cartridge disk with a recording disk stored are both insertable and providing, on the lid of this inserting port, a second inserting port into which only the bare disk is insertable.

SOLUTION: With a 12cm diameter bare disk 6 inserted into the slit 8 of a lid member, the disk surely comes into contact with the groove of a guide ring as it is held horizontally by a horizontal holding member in the rear.

In the case where an 8cm diameter bare disk 7 is inserted, similarly it comes into contact with the groove of the guide ring through the horizontal holding member.

In the meantime, with a cartridge disk 3 adjusted to and brought close to a slot 4, both ends come into contact with the two lock releasing rivets projecting in front of the lid 5, pushing it into the rear. Thus, the lid 5 can be freely opened or closed.

LEGAL STATUS

[Date of request for examination] 20.12.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
